Score Eight-ender at Crestwood Opening

Here's the picture to prove that Larry Meier, Vic Torrance, Harold Barber and Milt Younger have experienced a dream come true and are here posed with the eight rocks which brought them fame.

This foursome went to the city to attend the opening ceremonies of the Crestwood Curling Rink. While there they played a game against the Ashley Strong rink from Bruderheim and it was at the 6th end with the Strong rink leading by 2 counts that Larry and his crew

managed to pull off the above perfect end.

When Don Fleming of the Journal interviewed Ashley Strong and asked how it felt to be on the losing end of an eight count, he replied, "It's amazing how these things sneak up on you. I never realized it was about to happen until Larry came down to throw his last rock. He told me if they had the eight end, so I said, 'go to it.'"

Larry thereupon pulled one into the four foot for the eight

counter.

We understand that the Irma boys were on television afterwards too.

If you want a real account of how it happened just call at the Food Market like we did and Larry will place some containers of beef essence and some milk bottles on the counter and show you first hand just how those rocks were sitting.

Perhaps we should also add that Larry, Vic, Harold and Milt are sitting at the front of the house in this picture.

HOME AND SCHOOL ASSOCIATION

The Ice Carnival will be held on March 8. The Hardisty Skating Club will be in attendance with a very fine show.

A classification of the age groups for costume judging follows:

- Group 1—6, 7 and 8 years.
- Group 2—9 and 10
- Group 3—11 and 12
- Group 4—13 and over.

We are hoping for good ice and a fine show.

Nominations For Village Councillor

The following nominations for Village Councillor:

Frank Keith Coffin.
Clifford Percival Jones.
Date of poll, March 7, 1955.

A. C. Charter,
Returning Officer.

Glen-Coa Cleanings

Surely Mrs. James is the first in the district to get baby chicks. Mine arrived on the last day of February as chipper as you please.

Mrs. M. Fuder and Clifford of Wainwright visited at the Satre and C. Gullbraa homes last week.

Mr. Gordon Hollinger was a business visitor to Calgary the previous week.

Miss Aysa Satre spent a couple of days at home last week-end.

There have been quite a number on the sick list of late.

As winter has arrived at last, everyone prefers to stay at home. Roads have been blocked in a few places, but we are most fortunate that they are not any worse.

According to the Wheat Pool Budget, the average value of hogs marketed in Alberta last year was \$46.00 per head.

Hay, wheat, oats and barley have been grown as far north in Canada as Aklavik, on the Arctic Ocean.

Southern Sayings

Mr. and Mrs. F. Hill, Marylin, John, Knute and Muriel, Hugh and Aletha were Sunday visitors at the home of Ted and Doreen Hill: to celebrate Donna's first birthday.

WAIT FOR THIS—

Irma Legion Bingo, Saturday, April 9.

Dawson, Yukon Territory, claims a world's record yield of nineteen bushels of potatoes from nine pounds of seed.

Village of Irma

Advantages of Modern Waterworks and Sewerage Systems

Generally the advantages of modern water and sewerage facilities to a community can be divided into three categories: namely—health, comfort and economy.

The history of public health tells a graphic story of the part played by sanitary science in the health of modern civilization.

The second category, that of comfort is self-evident to anyone who has used a house with modern plumbing.

The matter of economy of having a modern water and sewer system is a point which is not too self-evident except to those who are directly connected with the installation and operation of those utilities.

Economic saving is affected in three ways; firstly by improving the public health standards, secondly by labor saving to those people who use the utilities, and thirdly an improvement in the fire safety ratings because of the availability of water for fire-fighting. This latter type of saving can be directly felt by the owners of property in the community when, with a proper water system, the fire insurance rates are lowered.

Another factor which is an advantage, but which probably could not be directly classified under the categories given above, is the effect that these utilities have in encouraging the construction of better homes and business buildings. This in the long run, helps to make the community more stable.

—Council of the Village of Irma.

EASTERLY ECHOES

Mr. Stuart Ferguson and his family moved to Edmonton and Peace River in the interest of the Hereford Breeders Association and the coming Edmonton Spring Show and Sale. Stu reports the Peace River is great country and the future of the beef industry there is very promising.

Mr. Bill Veer made a business trip to Calgary this week. His daughter, Darleen, accompanied him to renew acquaintances in the "old home town."

The flu bug is making its second or third round of the winter and the current low temperatures seem to have no bettering influence. The school buses are running noticeably half-loaded. Mrs. Jack Savard is a flu patient in the Wainwright hospital.

Several farmers in the district are preparing for spring by taking grain to the neighboring seed cleaning plants.

To The Editor

Irma, Alberta,
February 28, 1955.

Mrs. H. Riley,
Editor, Irma Times,
Irma, Alberta.

Dear Madam: In observance of Education Week, March 8 to 15, we extend to parents and other interested persons a cordial invitation to visit the classrooms of the school at any time during school hours on Tuesday, Wednesday and Thursday, March 8, 9 and 10, to observe the everyday work of the school. No unusual preparations will be made, since we feel that visitors should view regular classes, rather than special programs.

It is hoped that visitors will feel free to enter any classroom and remain as long as they wish. This will provide as well, we hope, an opportunity for parents to discuss any school problem with teachers or principal.

Yours sincerely,
Staff of the Irma School.

The federal government, now employing about 172,000 persons, is Canada's largest employer.

4th Beef Club Hold Bonspiel

A very successful bonspiel was held last Saturday, February 26. Fifteen rinks competed for the Grand Challenge which was taken by Nysvold of Chauvin over W. Fuder of Irma.

Prizes were as follows:

Grand Challenge

1. Nysvold, Chauvin, Trav-elalarm Clocks.
2. W. Fuder, Irma, Wallets.
3. Lewis, Merna, Pen and Pencils.
4. Pitman, Chauvin, Flashlights.

Consolation

1. H. Dootson, Irma, "Bed-room Lamps."
2. K. Currie, Irma, Canasta Cards.

3. Bennett, Mannville, Pens.
4. T. Chesterman, Wainwright, Flashlights.

Line-up of the rinks entered in the bonspiel:

- A. Archibald, Irma.
- J. Chesterman, Wainwright.
- W. Fuder, Irma.
- H. Dootson, Irma.
- C. Prior, Irma.
- Pitman, Chauvin.
- B. Dumbart, Irma.
- Bennett, Mannville.
- K. Currie, Irma.
- T. Chesterman, Wainwright.
- G. Maxwell, Ylking.
- R. Firkus, Irma.
- Nysvold, Chauvin.
- S. Smith, Mannville.
- Lewis, Merna.

Special thanks to the Home and School women who worked in the booth.

The next meeting of the Beef Club will be held in the school lunchroom Saturday, March 19, at 2 p.m.

—Verla Prior,
Press Reporter.

WITH THE District Agriculturist

By J. S. Duncan

Saving Pigs is Good Business

The profit in pig raising is greatest when the largest possible litters are raised. Most death losses occur in the first in the first few days after farrowing. To reduce these losses—

1. keep a breeding record, on each sow so that you know when she is due to farrow. Clean out the farrowing pen, bed it and check guard rails, heat lamps, etc., then put the sow in a few days before she is due to farrow.
2. Feed a laxative ration to the sow for a few days before and after farrowing.
3. Be on hand when the sow farrows to see that all the pigs get dried off and get a feed of the sow's first milk.
4. Watch sow and pigs the first few days to be sure that the sow has a good supply of milk.
5. Treat the pigs with reduced iron to prevent anemia.
6. Start the pigs on a creep feed when they are about two weeks old.

Livestock Improvement Policies

In order to help to improve the quality of livestock in the province the Alberta Department of Agriculture has policies set up to help farmers in the buying of purebred Bulls, Boars and Rams. The assistance in the buying of beef and dairy bulls consists of selecting the bull, paying the freight to the farmer, closest shipping point and paying 10 percent of the cost up to a maximum of \$50.00 (15 percent to a maximum of \$75.00 in purebred sire areas). In the buying of boars and rams the assistance consists of selecting the animal and paying the freight on it. None of these policies are applicable to purebred breeders. For full information on these policies see your District Agriculturist.

trade name and have, in a lot of cases, no idea of what they are actually putting into the soil. The analysis of fertilizers can differ greatly and while one analysis may give you good increases, another may not give any. I have a bulletin, "Fertilizers in Alberta" at my office which gives a lot of good information. Why not drop in and get a copy and talk over your problem.

Just a word on liquid fertilizers. There are types of liquid fertilizers on the market but so far they have not been proven to be very good in this part of the country.

Livestock Improvement Policies

In order to help to improve the quality of livestock in the province the Alberta Department of Agriculture has policies set up to help farmers in the buying of purebred Bulls, Boars and Rams. The assistance in the buying of beef and dairy bulls consists of selecting the bull, paying the freight to the farmer, closest shipping point and paying 10 percent of the cost up to a maximum of \$50.00 (15 percent to a maximum of \$75.00 in purebred sire areas). In the buying of boars and rams the assistance consists of selecting the animal and paying the freight on it. None of these policies are applicable to purebred breeders. For full information on these policies see your District Agriculturist.

Livestock marketing hearings set

REGINA. — Gordon Loveridge, chairman of the Saskatchewan Marketing Board has announced that definite dates and locations have been set for public hearings to receive representations by interested persons and groups respecting a proposed plan for the marketing of livestock in Saskatchewan.

The proposed plan has been submitted in accordance with the provisions of the Natural Products Marketing Act, and hearings will be held as follows:

Saskatoon: Odd fellows' Hall, Monday, March 7.

North Battleford: Public Library, Wednesday, March 9.

Prince Albert: Legion Hall, Friday, March 11.

Tisdale: Legion Hall, Monday, March 14.

Yorkton: Castle Hall, Wednesday, March 16.

Maple Creek: Community Hall, Monday, March 28.

Swift Current: Legion Hall, Tuesday, March 29.

Moose Jaw: Legion Hall, Thursday, March 31.

Carleton Place: Memorial Hall, Monday, April 4.

Regina: Oddfellows' Hall, Tuesday, April 5.

Sittings will commence at 10.00 a.m. and hearings at Saskatoon, Yorkton, Swift Current and Regina will be extended to the following day, in each case, if the number of representations to be made requires the additional time.

Those wishing to make representations should assist the board by advising the secretary at least one week in advance and also by submitting copies of the written briefs to be presented (six copies if possible).

Further information may be obtained by writing to W. F. Ferris, Secretary, 308 Legislative Buildings, Regina.

Agriculture gets most research

Probably no other industry in Canada has as much research directed towards increasing its efficiency as agriculture. Hundreds of workers from coast to coast at federal and provincial experimental farms and research laboratories are making intensive studies of a wide variety of agricultural problems.

These range from studies in animal nutrition to development of disease resistant crops; from soil conservation to woodlot management; from the effects of soil conditions on the economics of recently developed pest control chemicals.

In universities and at science service laboratories answers are being sought to such questions as: How do insects develop resistance to insecticides? Can some of the diseases affecting plants and livestock be reduced by feeding trace minerals? A new tool has been placed in the scientists' hands — radioactive tracers — which makes certain phases of their work infinitely easier.

Industry too is playing its part by providing better fertilizers and more effective chemicals for killing weeds and insects. Test plots are maintained to study how industrial products can best be used to increase crop yields and provide more abundant food supplies for all Canadians.

Once the work of research has passed to the farmer in many ways. The story is told in newspapers and farm magazines; over the radio and on television. Pamphlets and motion pictures are made readily available to junior farmer short-courses and adult study classes.

BIG INCREASE

REGINA. — Saskatchewan government statistics indicated the value of oil produced in the province last year would total more than \$8,000,000 compared with about \$3,000,000 during 1953.

The mineral resources department estimated oil production in 1953 would total about 10,000,000 barrels, and natural gas reserves at one trillion cubic feet.

There were 18 oil and nine natural gas discoveries in the province last year.

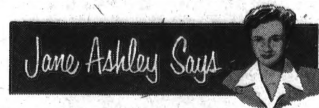

Only about 40 percent of the radiation received by the earth from the sun is in the form of light that can be seen.

BOOSTS FISHING

PRINCE ALBERT, Sask. — Marvin Lawrence of Heron Lake, Minn., liked fishing in northern Saskatchewan so much that he has published a booklet of his adventures. He won first place for great

northern pike in last year's Saskatchewan anglers' derby with a 30-pounder.

Numerous phosphorescent beetles are known as glow-worms. There are about 500 species.

"Try my favorite recipe for the month"

CHOCOLATE CREAM PIE

- 3/4 cup granulated sugar
- 4 tablespoons BENSON'S or CANADA Corn Starch
- 1/4 teaspoon salt
- 2 1/2 cups milk
- 1 square unsweetened chocolate
- 3 egg yolks, slightly beaten
- 1 teaspoon vanilla
- 3 egg whites
- 6 tablespoons granulated sugar
- 1 9-inch baked pie shell

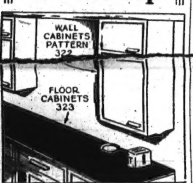

MIX sugar, BENSON'S or CANADA Corn Starch and salt in top of double boiler. ADD milk gradually, mixing until smooth. ADD unsweetened chocolate; place over boiling water. COOK, stirring constantly, until mixture thickens. COVER and continue cooking 10 minutes, stirring occasionally. Do not remove from heat. STRAIN a small amount of hot mixture into egg yolks. RETURN to double boiler immediately, blending mixture thoroughly. COOK 2 minutes longer, stirring constantly. BEAT egg whites until stiff but not dry; gradually beat in sugar, continue to beat until meringue stands in firm peaks. SPREAD meringue lightly over filling. BAKE in moderate oven (325°F.) 15 minutes or until delicately brown.

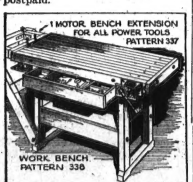

For free folder of other delicious recipes, write to: Jane Ashley, Home Service Department, THE CANADA STARCH COMPANY LIMITED, P.O. Box 129, Montreal, P.Q.

Home Workshop

The arrangement of wide and narrow shelves in this wall cabinet makes it possible to store a complete service of dishes for eight people in the lower compartment. Overall the wall cabinet is slightly over a foot deep, two feet wide and three and a half feet high. It is hung flush with an eight-foot ceiling. A work space of sixteen inches is allowed between the wall and floor cabinets. Dimension may be adjusted to suit. The two cabinets may be ordered separately at \$55 each, or they will be included in the packet of patterns for remodelling kitchens at 1.50 postpaid.

Here is a workbench that will stand up under the most rugged use. The reason is that it has a heavy base that is screwed and bolted together. The bolts supporting the screws at points taking the most strain. The top, made of 2-by-3-inch stock bolted side by side gives a good solid working surface. A useful feature about this bench is that an extension for power tools may be attached to the end. Your power tools are fixed to individual bases of plywood which may be interchanged on the extension in a jiffy, using bolts with wing nuts. Where space is limited this is a practical outfit to use various tools with only one motor. Patterns are \$35 each. Order \$38 for the bench and \$21 for the extension. Address order to: Department P.R.L., Home Workshop Pattern Service, 4433 West Fifth Avenue, Vancouver, B.C.

Juarez, Mexico, largest city on the American border, was named for Benito Juarez, liberator of Mexico. Holystone is a soft kind of sandstone used by masons for scrubbing and cleaning the decks of ships.

U.K. prize Herefords for Jubilee

LONDON. — British cattle breeders have hailed as a "most generous gesture" an offer of financial help from the Hereford Association of Canada and the Saskatchewan Show Committee that will enable them to send prize Hereford cattle to Saskatchewan's Golden Jubilee celebrations in Regina.

The British breeders who now plan to ship about 25 Herefords from a Scottish port to Canada early in May previously thought they would be unable to do so because the American Hereford Society boosted its ancestor checking fees.

"The host is on again because of a most generous gesture on the part of the Canadian," R. J. Bentley, secretary of the Herd Book Society, said.

"We had not counted on the Canadians. As soon as our decision (not to send the cattle) was announced, the Hereford Association in Canada and the Saskatchewan Show Committee, cabled offers to pay any registration fees required by the Americans. We have accepted this offer with pleasure and our top breeders are rallying around to send a representative display."

Seed grain must be clean

The results of provincial seed drill surveys made in 1954 are strikingly similar in most respects and point up the very definite need for greater care in the cleaning and preparation of grain that is to be used as seed. While most farmers sowed recommended varieties and a fairly large percentage of the samples were pure as to variety, the quality and the cleanliness of the seed used, in many instances was anything but good. In Manitoba, for instance, 50 percent of all samples analyzed graded "rejected," which means that the seed would not even make No. 3 Commercial.

FAMILIAR HELMET

VICTORIA. — Victoria police constables may go back to wearing the London bobby type of helmet that was discarded five years ago. The Chamber of Commerce will urge the authorities to resume the headgear.

Live right—Eat right—Feel right

Manitoba issues booklet on weeds

A question-and-answer form booklet has been prepared by the Manitoba Weeds Commission on questions dealing with weed control with special emphasis on the use of chemicals.

In addition to brief, concise answers to questions classified under a wide variety of headings, the 15-page booklet contains illustrations and highlights special aspects of weed control methods. Tables list recommended amounts of chemicals to be used as spray on cereals or flax. Weeds and woody plants common to western Canada are classified as to their reaction to 2,4-D and MCP.

The booklet is available free of charge from the Weeds and Publications branch of the department of Agriculture and Immigration, Winnipeg, or from any agricultural representative office in Manitoba.

Today is yesterday's pupil.

3 tempting whole-wheat varieties from One Basic Dough!

Make these treats with new Active Dry Yeast

If your family enjoys whole-wheat bread, give them not one but three treats next time you bake! See how Fleischmann's Active Dry Yeast helps you to save a variety of tempting things with no extra trouble. When you bake at home, make sure you have Fleischmann's on hand.

Basic WHOLE WHEAT Dough
 3 1/2 cups milk
 3/4 cup granulated sugar
 4 1/2 teaspoons salt
 1/4 cup shortening
 Remove from heat and cool to lukewarm. In the meantime measure into a large bowl:
 3 1/2 cups lukewarm water
 3 tablespoons granulated sugar
 and stir until sugar is dissolved. Sprinkle with contents of 3 envelopes Fleischmann's Active Dry Yeast!
 Let stand 10 minutes, THEN stir well. Stir in lukewarm milk mixture.

1. WHOLE WHEAT BREAD
 Shape one portion of dough into a loaf and let rise in a greased bowl until doubled in bulk. Bake in moderately hot oven, 375°, about 30 minutes, covering loaf with heavy brown paper after first 15 minutes of baking.
2. PAN BUNS
 Cut one portion of dough into 18 equal-sized pieces. Shape each piece into a smooth round ball and arrange in a greased 8-inch square cake pan. Grease tops. Cover and let rise until doubled in bulk. Bake in moderately hot oven, 375°, about 20 minutes. Split rolls and fill with salad or heated wieners.

ALBERTA HONORS HER PIONEERS

with Senior Citizen Scrolls

For their contribution to Alberta's Fifty Golden Years, all pioneers who were in the Province at the time of its establishment in 1905 or before, will be presented with Senior Citizen Scrolls, upon application. Crests on the delicately engraved border of the scroll will depict history motifs of the province, and the script will identify the recipient as a Senior Citizen. The name will be hand written on each scroll by an artist.

WHO MAY APPLY:

All persons who have been in residence in the province since the year 1905 or prior, may apply for a Senior Citizen Scroll. A short period of absence does not disqualify you.

HOW TO APPLY:

Application must be made for scrolls. Forms will be available soon at Municipal Offices in each district or from the Jubilee Committee. Completed application forms are to be sent to the Committee (address below).

CLOSING DATE for APPLICATIONS — AUGUST 1st, 1955

To enable the Jubilee Committee to prepare and distribute the scrolls, your co-operation is requested. Complete applications must be received by August 1, in order that distribution may begin by August 22.

DISTRIBUTION OF SCROLLS

The majority of scrolls will be mailed from the Jubilee office to the applicant, but communities wishing to be responsible for distribution at special presentation ceremonies, even prior to August 22, are requested to prepare a list of eligible citizens and ensure that application forms are submitted well in advance of the date scrolls are required.

HONORING OUR PIONEERS

They, who homesteaded in Alberta at the turn of the century, or who pioneered in industry—they, who saw the birth of a great province and contributed to 50 years of progress—it is they who are worthy of a special and personal commendation by the rest of us—their relatives, friends and neighbors. Whatever the date, wherever the presentation of a Senior Citizen Scroll—in a home or at a public gathering, join in our Golden Jubilee Celebrations by adding your personal congratulations.

GOLDEN JUBILEE COMMITTEE

ROOM 119 - LEGISLATIVE BUILDING - EDMONTON, ALBERTA

Kinsella News

Miss Dorothy Smith spent the week-end with her brother-in-law and sister, Mr. and Mrs. W. Sarasin at Wainwright.

L.A.C. and Mrs. R. Mulawka of Edmonton, were recent visitors at the home of Mr. and Mrs. M. Mulawka.

Plan to attend the St. Patrick's dance sponsored by the Kinsella W.I. to be held in the Memorial Hall on Friday, March 18.

Due to the cold weather, work at the rock crusher west of town was suspended for a few days.

Mrs. G. Paterson entertained at tea Thursday afternoon in honor of her mother, Mrs. A. Milne, on the occasion of her birthday anniversary. A beautifully decorated cake was made by Marilyn Paterson.

There will be a dance in the Rodino School on Friday, March 11.

Mr. C. Horinek won a case of frozen strawberries and Mr. A. Doerksen won 12 cartons of frozen orange juice at a Quick Freeze demonstration which was held in Viking last week.

We are pleased to report that Mrs. R. Cormack who had a bad fall from the church steps last Sunday is feeling much better.

Greg Loades enjoyed a week-end visit with his friends, the Horinek boys.

A Hobby Show and "Open House," sponsored by the Kinsella students union, was held in the new school last Friday afternoon. The display of hobbies (paintings, character dolls, petti point, coin collections, artificial flowers, model airplanes, knitting, etc.) were much admired by a large number of parents and other visitors. Virgil Lysgard won first prize with

FUA HAS OVER 50% SIGNUP

EDMONTON, February 28 — Realization of an 82-year-old objective to enroll a clear majority of working farm families in one provincial union, was announced from Farmers' Union of Alberta headquarters during the week-end.

According to Waldo D. Summers, who promoted the one day "ROUNDUP" campaign, mop-up operations have resulted in the FUA achieving the long-sought-after goal. The objective was reached February 15, he said. The figures, from which returns from the B.C. Block were excluded, showed there were 62,300 persons in membership as at February 19. Of this total 39,202 were farm operators, a margin of over 1,000 over the halfway mark.

Alberta now is said to have the distinction of having the first and only non-commercial farm body in Canada to surpass the 50 percent signup in annually paid memberships. In the States, only North Dakota has so far achieved a majority sign-up of resident farmers, Mr. Summers stated.

Canadians spend about two and a quarter billion dollars a year in food stores, less than a third of the total they pay in taxes to all governments.

his collection of antiques. Second prize was won by George Carpenter with a model diesel train and Mrs. J. Campbell won third prize with a display of knitting and crocheting. The highlight of the afternoon was when Leland Garvie was presented with the Governor General's Medal.

P.S. More about Leland Garvie in next week's issue.

MUNICIPAL DISTRICT OF WAINWRIGHT NO. 61

CHAS. WILBRAHAM,
Secretary Treasurer.
18-25-4

It is estimated that every 25,000 immigrants increase the bread consumption in Canada by 4,000,000 loaves annually.

Of total revenue of \$27,430,725 in the year ending March 31, 1954, the CBC obtained \$3,806,354 from commercial broadcasting and the remainder from taxes earmarked for the CBC and from parliamentary grants out of general tax revenue.

Agriculture Alberta's Largest Industry

Food one of our basic necessities comes directly from the soil, or from animals that consume plants such as grass, clover and grain. Life depends upon the soil and the uses to which it is put. Agriculture is the most general occupation of man. It remains Alberta's most important industry.

Alberta's Department of Agriculture makes every effort to help farmers with their problems, to promote interest in agriculture and to encourage the best use of our rich soil resources. The potential of Alberta agriculture keeps the department's eye on the future. Its more immediate task is to create an environment that will enable farm families to maintain a high standard of living and preserve the qualities of their lands. As agriculture in Alberta expands, this will remain the basic responsibility of the department.

Alberta's farm population is approximately 345,000 living on about 64,000 farms. Total value of all agricultural production in 1953 was in the neighborhood of \$896,000,000. However, farm income for any year is less than total value, due to a substantial part of field crops being utilized by the farmers themselves in the production of livestock and poultry. Actual cash income to Alberta farmers in 1953 is calculated at approximately \$492,000,000, a reduction of four per cent from the previous year.

We have in Alberta about 68 million acres of land suitable for farming. The potential area of arable land in Alberta exceeds that of any other province. About 44.5 million acres are now occupied and some 22.3 million acres improved. Each year about seven million acres are sown to wheat and slightly less to coarse grains, while some six million acres are in summerfallow. The balance is chiefly in mixed grains, seed and haylands.

Alberta has long been noted for its irrigation development, and the Department of Agriculture is assisting this work financially and technically. Much of the Province will remain important for ranching and dry farming only, but it is estimated that about 2,000,000 acres within our borders are suitable for highly specialized irrigation farming. At the present time projects involving 789,000 acres are operating successfully. Projects under construction or those to which immediate consideration is being given total another 951,000 acres. Other developments which will bring water to another 400,000 acres.

Since irrigation multiplies the carrying capacity of the land and greatly increases its productivity, projects now developed and those planned for the future are of great importance to the stability of the industry and indeed to the entire economy.

Agriculture in Alberta is making an important contribution to the Province and to Canada. It will continue to do so, in ever increasing measure, as the years go by.

Municipal Dist. of Wainwright No. 61

TO THE ELECTORS OF THE MUNICIPAL DISTRICT

Owing to the redistribution of the Electoral Divisions of the Municipal District care should be taken to assure yourselves of the Division you are entitled to vote in, and that your name appears on the Voters List or Supplementary List of that Division.

Special Notice is given to the Electors of the new Division 1, 2 and 3. Electors in Division 1 may vote at the Village of Chauvin if they wish. Electors in Division 2 may vote at the Village of Edgerton if they wish but Electors of Division 3 must vote in Division 3 at any polling place in Division 3.

Special Notice is given to the Electors of the new Division 4 and 5. Electors in Division 4 may vote at the Municipal Office, Wainwright, if they wish but Electors of Division 5 must vote in Division 5 at any polling place in Division 5.

Special Notice is given to the Electors of the new Division 6 and 7. Electors in Division 6 may vote at the Village of Irma if they wish but Electors of Division 7 must vote in Division 7 at any polling place in Division 7.

If in doubt please phone the Municipal Office, Wainwright, Number 94, or call at the said Office prior to the 14th day of March.

4-11-18c

RETURNING OFFICER.

- Notice -

COUNTY AND MUNICIPAL DISTRICT ELECTIONS

PERSONS ENTITLED TO VOTE:

(a) Every person of the full age of twenty-one years whose name appears upon the voters list by virtue of being on the assessment roll.

(b) Every person whose name does not appear upon the voters list pursuant to clause (a) who is a Canadian Citizen, of the full age of twenty-one years and who has continuously resided in the division in which the election is being held for a period of six months immediately preceding the day fixed for the nomination of candidates.

PLACE OF VOTING:

(1) An elector who is resident in a division and qualified in respect of land therein shall vote only in that division.

(2) A person, who by reason of land, is a qualified elector in a division, but who does not reside therein, whether his residence be within the municipal district or not, shall vote only in the division in which the land in respect of which he is qualified is situated.

(3) A person who is qualified as an elector by reason of land in more than one division shall vote only in the division in which his assessment is higher.

(4) A person who is a qualified elector other than by reason of land shall vote only in the division in which he resides.

GENERAL RULES:

(a) OWNERS AND PURCHASERS—Where there is an owner or owners and a purchaser or purchasers in respect of any parcel or of any part, share or interest therein, the only person or persons entitled to vote in respect to the parcel or any part, share or interest therein shall be the purchaser or purchasers, if any, entitled to the possession thereof or if there be no such purchaser or purchasers the owner or owners thereof.

(b) JOINT OWNERSHIP—If two or more persons own land jointly, all are entitled to vote. If the names of all joint owners are not on the voters list, the elector whose name has been omitted may take the oath or affirmation set out in Form 16 of The Municipal District Act, 1954.

(c) OFFICER OF A CORPORATION—The representative of a corporation may vote upon production of a certificate from the Head Office of the Corporation authorizing him to represent it, and upon subscription to the oath in Form 2 of The Municipal District Act, 1954.

A person shall not represent more than one corporation and no person shall be entitled to vote for a corporation if he is otherwise entitled to vote in the municipal district election.

(d) ONE VOTE ONLY—An elector may vote for one candidate only and if he votes for more than one his ballot shall be void and shall not be counted.

(e) OBJECTION BY CANDIDATE—A candidate or his agent has the right to object to a person voting and in such case the person objected to may only vote when he has taken an oath as set out in Form 17 of the Schedule to The Municipal District Act, 1954.

(f) REFUSAL TO TAKE OATH OR AFFIRMATION—When any elector is required to take any oath or affirmation and refuses to do so, he is not entitled to vote and must leave the polling place immediately. 4-11-18c

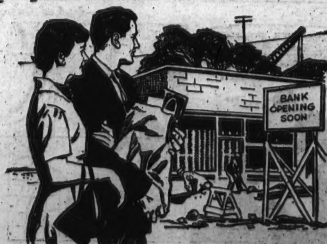

Among the benefits of Branch Banking...

Your local bank is an essential link between your community and the whole banking world.

In remote areas, Canadians enjoy the same broad range of bank services, the same sense of security.

As communities develop, banking services are made available to meet new and growing needs.

Banking in Canada works in such a way that your local bank manager brings you all the resources, knowledge and experience of the bank he represents. It has branches throughout Canada and provides contacts the world over. The benefits of this branch banking system, developed to meet Canadian needs, are demonstrated every day by the quality and scope of your local banking service.

THE BANKS SERVING YOUR COMMUNITY

Viking Items

RECOVERING FROM SERIOUS ACCIDENT

This community is glad to hear of the recovery of young Keith, son of Mr. and Mrs. Al Rosen from a serious accident.

Keith, who is two years old, fell into a tub of scalding hot water in his home on February 10 and received third degree burns that many times prove fatal. His recovery speaks well for the efficient professional care given him at the hospital and by persons in other ways who assisted in what is anticipated to be a complete recovery.

Local Grain Grades Higher in North Dakota

Last summer, Mr. Silver Had-so had a visit from a friend from Kantyre, North Dakota. When returning home he took with him a few samples of 1954 wheat grown in this district. Wheat that graded locally No. 2, 3 and 4 graded No. 1; No. 5 graded No. 2, and feed wheat graded No. 4. In North Dakota wheat is graded by weight only, which possibly has something to do with the difference in grades here and in North Dakota.

Canada's first Red Cross flag, flour sack in Riel rebellion

A curiosity of considerable historic interest is to be found in the Ross Robertson collection of pictures in the Reference Library of Toronto, Ontario. It is the first Red Cross flag ever used in Canada and was improvised by the late Surgeon-General G. Sterling Ryerson, M.D., M.A., for use during the Riel Rebellion in the North West Territory during the engagements at Fish Creek, May 24th and at Batoche, May 9-12, 1885. The flag is framed and appears to have been made from an old flour sack, a cross in Turkey red cotton being roughly stitched upon it.

Writing his memories of past days in a volume entitled "Looking Backward," Dr. G. Sterling Ryerson said:

"I was now relieved of my duties in connection with the wounded as the First Field Ambulance under Surgeon-Major Casgrain had arrived in camp on the 8th. One of the officers was Dr. E. E. King, who afterwards became assistant surgeon of the Grenadiers and who is still the esteemed medical officer of the regiment with the rank of Lieutenant-Colonel."

"It should be understood that a medical officer was only responsible for the sick and wounded on his own battalion. I had a spring wagon drawn by two horses, in which we carried stretchers and other medical equipment. To distinguish it from ordinary transport, I made a flag of factory cotton and sewed on it a Geneva Red Cross made of a piece of Turkey red which I got from the ammunition column. This was the first Red Cross flag in Canada. The driver of the transport was

a man named Webb, a brave man who helped us to withdraw the wounded from the church (where they had been placed for safety and treatment), although he was not in duty bound to do so."

Dr. Ryerson had a very eminent medical and military record. He served in the Fenian Raid of 1870, the Riel Rebellion of 1885, the South African War, the Austrian Army Occupation of Bosnia, 1878, and in the Great War of 1914-1918. His military record began on enlistment as a private in the Queen's Own, ending up, before his regrettable demise, with the high rank of surgeon general, honorary major-general and colonel-in-chief.

The Canadian Red Cross has also owed much to this distinguished gentleman as its founder and a past president in Canada. In making the first rough Red Cross flag known to the history of the Dominion, the late Dr. Ryerson began one of the most searching humanitarian movements this country has ever known.

4 delicious treats ...make them from One Basic Dough!

It's amazingly simply with wonderful active dry yeast!

If you bake at home, find out the wonderful things you can do with Fleischmann's Active Dry Yeast. Serve elegant rolls or fancy breads in variety from a single dough! Always get Fleischmann's Active Dry Yeast—it stays fresh in your cupboard, and acts fast in your dough!

BASIC ROLL DOUGH

- 1 cup milk
- 3 tablespoons granulated sugar
- 2½ teaspoons salt
- 4 tablespoons shortening

Remove from heat and cool to lukewarm. In the meantime, measure into a large bowl:

- 1½ cups granulated sugar
- and stir well sugar is dissolved. Sprinkle with contents of:

- 1 envelope Fleischmann's Active Dry Yeast

Let stand 10 minutes. THEN stir well in: cooled milk mixture and ½ cup lukewarm water.

Stir in:

- 1 cup unsifted bleached flour and beat until smooth and elastic; work in

- 3 cups more (sifted) unsifted bleached flour.

Turn out on lightly-floured board and knead dough lightly until smooth and elastic. Place in a greased bowl and grease top of dough. Cover and set dough in warm place, free from draught, and let rise until doubled in bulk. Turn out dough on lightly-floured board and knead lightly until smooth. Divide into 4 equal portions and finish as follows:

1. PARKER HOUSE ROLLS

Roll out one portion of dough on lightly-floured board to 16-inch thickness; cut into rounds with 3-inch cutter; brush with melted butter or margarine. Grease each round deeply with milk and roll, a little to one side of center; fold larger half over smaller half and press along the fold. Place, just touching, each other on greased cookie sheet. Grease tops. Cover and let rise until doubled in bulk. Bake in a hot oven, 400° about 12 minutes. Makes 8 rolls.

2. CLOVER LEAF ROLLS

Cut one portion of dough into 8 equal-sized pieces; cut each piece into 3 little pieces, 11-inch lengths. Roll each piece a half and brush with melted butter or margarine; arrange 3 rolls in a row and overlap. Grease and let rise until doubled in bulk. Bake in a hot oven, 400° about 12 minutes. Makes 8 rolls.

3. PAN TANS

Roll out one portion of dough on lightly-floured board to 16-inch thickness; cut into strips with 3-inch cutter. Roll up each strip with melted butter or margarine and cut into 12-inch lengths. Place each piece a row side up, in a greased muffin pan; separate the pieces a little at the top. Cover and let rise until doubled in bulk. Bake in a hot oven, 400° about 12 minutes. Makes 12 rolls.

4. CRESCENT ROLLS

Roll out one portion of dough on lightly-floured board to 16-inch thickness; cut into strips with 3-inch cutter. Roll up each strip with melted butter or margarine and cut into 12-inch lengths. Place each piece a row side up, in a greased muffin pan; separate the pieces a little at the top. Cover and let rise until doubled in bulk. Bake in a hot oven, 400° about 12 minutes. Makes 12 rolls.

Fashions

Jr. dream dress!

by Anne Adams
(11-17)

Lucky, lucky Jr. You can see this dream dress in fifty-time wear it—and watch the admiring glances come all your way! It's the most flattering frock imaginable—a lowered princess waistline atop your favorite whirly skirt! Eye-catching, indeed!

Pattern 4781: Jr. Miss Sizes 11, 13, 15, 17. Size 13 takes 4½ yds 38-inch fabric.

This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions. Send thirty-five cents (35c) in coins (stamps cannot be accepted) for this pattern. Write plainly: Size, Name, Address and Style Number and send orders to:

Department P.P.L.,
Anne Adams Pattern Dept.,
60 Front Street W., Toronto 1.

No danger even with evil intent

D. B. Williams, in charge of purification at the Brantford Filtration Plant, says: "It would take four tons of sodium fluoride per million gallons of water to produce the earliest stages of nausea. We never have four tons of fluoride in the plant in the first place. If all of our chemical feed machines, the chlorinators, alum feeders, fluoride machines etc., were magically converted to apply a chemical of a very poisonous nature the capacity of all these machines is such and the dilution so great that, even with evil intent, we could not endanger the health of our public."

Kitchen Meditations

By JANE DALE

LIFE IS LIKE THAT

We worry ourselves sick or else some petty thing.
Spending treasured hours wringing our hands;
That day passes with the problem forgotten.

As something else comes to make its demands—
Life is like that!

We wonder how we ever will make expenses;
As we count resources with growing dismay;
Yet, looking back over many occasions,

We've had alms to spare and bread for each day.
Life is like that!

We're afraid we never can shoulder our burdens;
The way is so long and rough is the hill;
Yet oddly enough our crosses seem lighter

When we have a voice which bids us—"Be still!"
Life is like that!

Federal restrictions against the sale of liquor to Indians were removed in 1953.

THE TILLERS

Habits, movements of walrus being charted by government

The walrus lives in Canada's Arctic seas. Along the coasts of the eastern Arctic, attains a length of 15 feet and weighs up to 1,500 pounds. The walrus uses its tusks mainly to dig clams and only seldom for combat. Ungainly on land, it is a graceful performer in the water.

The walrus can draw its eyes deep into the sockets for warmth or make them protrude more than an inch from the eyelids for greater range of vision. It can sleep in the water by hooking its tusks on an ice floe, but can't stay under water for more than five minutes.

For years, the Eskimos have lived on the flesh of the walrus and the meat is also used to feed Eskimo dogs.

"But in recent years walrus herds haven't been appearing in their accustomed places, a serious matter for 5,000 eastern Arctic Eskimos."

So the northern affairs department decided to find out what it could about the walrus population and its movements, no easy job because the walrus is a gregarious sort.

Tag devised

First of all, an official said recently, a method had to be devised to tag the mammal. The ivory detachable head of an Eskimo harpoon looked like a good starting point and a stainless steel tag attached to a dart shaped like a harpoon head was developed.

Last summer men of the Canadian wildlife service, working with the Eskimos, tagged 30 walrus off Coats Island in Hudson Bay by chasing them in 40-foot boats until they were close enough to hit with the darts.

Incidentally, if you ever go on a walrus hunt, don't shoot the mammal in the head. That way, it is killed immediately and sinks to the ocean bottom. Instead, hit the walrus in the lungs. It will inflate and stay afloat until you can tow it to shore and cut it up.

Posters printed in Eskimo syllabic script were distributed, asking the Eskimos to turn in any tags found in the walrus they killed.

Two of the 30 tags have been turned in, the northern affairs department said, from walrus killed off Southampton Island, not far

north of Coats Island.

This seven percent return, the department said, is enough to indicate that the tagging program will be a success.

KEEP CLEAN

A baby can give himself some very nasty scratches if his fingernails are allowed to grow too long. To protect him, they should be cut short and curved. When he is old enough to crawl on the floor or in his playpen, a clean cover should be spread over the area of the pen or where he will sit, so that his small hands will not pick up dirt and germs brought in on people's shoes.

LEAPING FISH

Under ideal water conditions, such as Pacific salmon have been known to leap 10 feet in the air during upstream spawning migrations.

A new way of easing pain of injections

A new way of easing the pain of injections—of particular importance for those whose illness requires continued and frequent "shots"—is reported by Dr. Theodore Cornbleet, of Chicago's University of Illinois College of Medicine.

This technique is to produce a wheal in the skin with a droplet of the hormone hydrocortisone. He has found that the wheal develops into a harmless, small bump of seemingly dead tissue, and that a hypodermic needle inserted at this site produces almost no pain. The "painless island" of skin lasts for 10 to 14 months.

The physician suggests that for diabetics four such areas be created, two on each thigh, thus enabling the patient to give himself painless insulin injections for an entire year. The process can be repeated without any ill effects.

NO PLACE LIKE HOME

The emigration of Scottish men and women to Canada, the United States and Australia from the Hebrides seems to be on the ebb today. The Hebridean is beginning to realize that life at home is not so hard as it might be in the never lands.

Coconut Fudge Chiffon Cake

Sift into a bowl, 1 c. plus 2 tb. once-sifted cake flour, 1½ tsp. Magic Baking Powder, ½ tsp. salt, ¼ c. fine granulated sugar; mix in ½ c. deacidified coconut. Make a well in dry ingredients and add in order given (do not stir mixture), ¼ c. corn (mashed), 2 unbeaten egg yolks, ¼ c. plus 2 tb. water, 1 tsp. vanilla, 2½ oz. unsweetened chocolate, melted and cooled. Stir liquid a bit, then stir in dry ingredients; beat until batter is smooth. Measure into a large bowl ½ c. egg whites (at room temperature) and sprinkle with ¼ tsp. cream of tartar; beat until whites are very stiff—much stiffer than for meringues, etc. Add flour mixture, about a quarter at a time, and fold after each addition until batter and egg whites are well combined. Turn batter into an ungreased 8" angel cake pan; bake in rather slow oven, 325°, about 1 hour. Immediately cake comes from oven, invert pan and suspend cake until cold.

Always Dependable

211 volunteer blood donors sustain boy's life

Pictured above you see five-year-old Larry of Regina, Sask., receiving one of the 211 blood and plasma transfusions given to him during 1954. Doctors believe that this bright little lad may have to continue receiving transfusions indefinitely, because Larry was born with a rare disease known as hemophilia. Larry's very existence depends on the generosity of Red Cross volunteer blood donors every week of the year. This is only one of the many unusual services rendered routinely by the Red Cross Blood Transfusion Service.

Some of us have little idea of what is involved in a service of this nature. For example, prior to the inauguration of this free service, parents or other responsible persons would have been faced with the fearful task of sufficient blood donors every week or funds to purchase the necessary blood which, in this case, could have cost approximately \$60.00 per week or over \$3,000.00 per year not including other important incidental expenses. Now the Red Cross and the thousands of volunteer blood donors have com-

bined to assume this responsibility. People all over Saskatchewan are doing their bit to help Larry.

Because of this teamwork, the overall costs are cut to a minimum. Yet, it still requires an expenditure of approximately \$1,000.00 a year from Red Cross funds to make the free blood available to this one patient. In addition, the facilities of the Junior Red Cross Hospital and the transportation from and to his home are provided by the Junior Red Cross members.

This is only one of the dozens of cases in Saskatchewan that, received mass transfusions of 10 or more during the past year. There were also thousands of hospital patients who were provided with at least one transfusion at no cost to the patient.

Through your Red Cross you are able to extend a neighbourly hand to help less fortunate people over the rough spots of life. It is not possible for everyone to donate blood, but during the March campaign for funds, perhaps everyone can assist with the financial cost of this and other Red Cross services.
